

TFWCs w/ reverse TCP Sack

Reverse TCP

- Random FTP start time: 1s ~ 5s
- Random Access Link Delay: 2ms ~ 5ms
- e2e RTT = 44ms ~ 50ms
- Delay x Bandwidth = 20ms x 15Mb/s
= 300 Kbits
- 1 packet = 1000 bytes = 8000 bits
- Delay x BW = 37.5 packets

2 TFWC w/ 2 reverse TCP
Bottleneck (RED) $Q = 20$
Simulation Time = 100
Random Seed Number = 177

Phase Break = On
Probability = 10%

cwnd dynamics

average loss interval

2 TFWC w/ 2 reverse TCP
Bottleneck (RED) $Q = 40$
Simulation Time = 100
Random Seed Number = 177

Phase Break = On
Probability = 10%

cwnd dynamics

average loss interval

2 TFWC w/ 2 reverse TCP
Bottleneck (RED) $Q = 80$
Simulation Time = 100
Random Seed Number = 177

Phase Break = On
Probability = 10%

cwnd dynamics

average loss interval

4 TFWC w/ 4 reverse TCP
Bottleneck (RED) $Q = 20$
Simulation Time = 100
Random Seed Number = 177

Phase Break = On
Probability = 10%

cwnd dynamics

average loss interval

4 TFWC w/ 4 reverse TCP
Bottleneck (RED) $Q = 40$
Simulation Time = 100
Random Seed Number = 177

Phase Break = On
Probability = 10%

cwnd dynamics

average loss interval

4 TFWC w/ 4 reverse TCP
Bottleneck (RED) $Q = 80$
Simulation Time = 100
Random Seed Number = 177

Phase Break = On
Probability = 10%

cwnd dynamics

average loss interval

8 TFWC w/ 8 reverse TCP
Bottleneck (RED) $Q = 40$
Simulation Time = 100
Random Seed Number = 177

(draw only for the first four traffic sources)

Phase Break = On
Probability = 10%

cwnd dynamics

average loss interval

16 TFWC w/ 16 reverse TCP
Bottleneck (RED) $Q = 40$
Simulation Time = 100
Random Seed Number = 177

(draw only for the first four traffic sources)

Phase Break = On
Probability = 10%

cwnd dynamics

average loss interval
